Experience

Virtusa

Sep 2023 - Present

Associate Software Developer

Hyderabad, India

Contributed to scalable software solutions, by developing and optimizing **Java-based systems**, **RESTful APIs**, and **microservices architecture**.

- Developed 50+ **REST APIs** with **Spring Boot**, **Hibernate** and **ORM**, ensuring thread safety, high throughput, and reliable frontend-backend communication.
- Built **Java-based data pipelines** processing **1M+ records** using **Spring Batch**, **Gradle**, and **JDBC**
- Secured role-based authentication for **3 user types** with **Spring Security & JWT**, mitigating OWASP vulnerabilities (**XSS**, **CSRF**, **SQL Injection**).
- Collaborated in **Agile sprints** using **Jira**, improving task delivery efficiency by **50%**, while applying clean coding practices, design patterns, and enhancing **Git workflows** for seamless **CI/CD integration**.

Internship

Virtusa

May 2022 - Aug 2022

Summer Intern – APE App and Platform Engineering

Chennai, India

Developed **MedBlock**, a decentralized healthcare platform leveraging **Blockchain** for secure data management and optimized smart contract workflows.

- Implemented **access controls**, ensuring **patient data privacy** and **regulatory compliance**.
- Designed an **immutable medical record system**, increasing **transparency** for stakeholders.
- Optimized **smart contracts**, reducing **transaction processing time** by **35%** and improving efficiency.

Mastek

Nov 2021 - Apr 2022

Software Development Intern

Mumbai, India

Engineered a **web platform** for virtual meeting summarization, integrating **NLP** and **browser extensions**.

- Implemented a **web platform** for automated meeting summarization, boosting team productivity by **50%**.
- Engineered a **browser extension** for real-time meeting transcription with **90% accuracy**.
- Integrated **NLP techniques** to produce **concise meeting summaries** for enterprise use.

Projects

Companylyzer (Team Project) | *Python, FastAPI, React, Chroma DB, LLMs*

- Built an **AI-driven platform** for business resolution generation, enhancing decision-making.
- Integrated **Large Language Models (LLMs)** to deliver **context-aware responses** with **95% improved accuracy**.
- Utilized **FastAPI** for backend, **React** for frontend, and **Chroma DB** for **efficient data retrieval**.
- Created a **user-friendly interface**, reducing **document creation time** by **50%**.

Education

SOA University

Jun 2019 - Jul 2023

Bachelor of Technology in Computer Science(CGPA of 8.47)

Odisha, India

Achievements

- Earned **Microsoft Certified: AI and Cloud Fundamentals**, credential in **AI** and **Cloud Computing**.
- Achieved **Oracle Certified Associate, Java SE 8 Programmer**, validating **Java Programming** expertise.
- Secured **1st Runner-Up** in **Virtusa IntelliOps Hackathon** for innovative solutions.
- Received **Jatayu Explorer Award** in **Jatayu Season II Hackathon** for technical excellence.

Technical Skills

Languages: Java, Python, Solidity, C, SQL

Databases: Oracle, MySQL

Frameworks/Libraries: Spring Boot, Spring MVC, Microservices, Hibernate, Maven, Gradle, ReactJs

CS Concepts: OOP, DSA, OS, Networks, Design

Web: HTML, CSS, JavaScript, Flask, REST API's

Cloud & DevOps: AWS, Azure, Docker, Kafka, Git

Tools: VS Code, IntelliJ, Postman

ML/DS: Scikit-learn, NumPy, Pandas
